# SF 144-A / SFH 144-A cordless drill / driver

en

**It is essential that the operating instructions are read before the power tool is operated for the first time.**

**Always keep these operating instructions together with the power tool.**

**Ensure that the operating instructions are with the power tool when it is given to other persons.**

**1** These numbers refer to the corresponding illustrations. The illustrations can be found on the fold-out cover pages. Keep these pages open while studying the operating instructions.

In these operating instructions, the designation "power tool" always refers to the SF 144-A cordless drill/driver or SFH 144-A cordless hammer drill/driver with battery fitted.

## Operating controls and parts **1**

- ① Quick-release chuck
- ② Torque and operating mode setting ring
- ③ Side handle
- ④ Control switch (with electronic speed control)
- ⑤ Forward / reverse switch
- ⑥ Motor brake
- ⑦ Two- or three-speed gear selector switch
- ⑧ Type identification plate
- ⑨ Grip
- ⑩ Battery release button (2 buttons)

## 1 General information

### 1.1 Safety notices and their meaning

**DANGER**

Draws attention to imminent danger that will lead to serious bodily injury or fatality.

**WARNING**

Draws attention to a potentially dangerous situation that could lead to serious personal injury or fatality.

**CAUTION**

Draws attention to a potentially dangerous situation that could lead to slight personal injury or damage to the equipment or other property.

**NOTE**

Draws attention to an instruction or other useful information.

### 1.2 Explanation of the pictograms and other information

**Warning signs**

General warning

Warning: electricity

Warning: caustic substances

## Obligation signs

Wear eye protection

Wear a hard hat

Wear ear protection

Wear protective gloves

Wear breathing protection

## Symbols

Read the operating instructions before use

Return waste material for recycling.

Volts

Direct current

Rated speed under no load

Revolutions per minute

Hammer drilling

Drilling without hammering

## Location of identification data on the power tool

The type designation can be found on the type identification plate and the serial number on the side of the motor housing. Make a note of this data in your operating instructions and always refer to it when making an enquiry to your Hilti representative or service department.

Type: \_\_\_\_\_

Serial no.: \_\_\_\_\_

en

## 2 Description

### 2.1 Use of the product as directed

The SF 144-A is a hand-held, cordless drill/driver for driving and removing screws and for drilling in steel, wood and masonry.

The SFH 144-A is a hand-held, cordless hammer drill/driver for driving and removing screws, for drilling in steel, wood and masonry and for hammer drilling in lightweight concrete and masonry.

Working on materials hazardous to the health (e.g. asbestos) is not permissible.

Do not use the battery as a power source for other unspecified appliances.

Modification of the power tool or tampering with its parts is not permissible.

To avoid the risk of injury, use only genuine Hilti accessories and insert tools.

Observe the information printed in the operating instructions concerning operation, care and maintenance.

Nationally applicable industrial safety regulations must be observed.

The power tool is designed for professional use and may be operated, serviced and maintained only by trained, authorized personnel. This personnel must be informed of any special hazards that may be encountered. The power tool and its ancillary equipment may present hazards when used incorrectly by untrained personnel or when used not as directed.

The working environment may be as follows: construction site, workshop, renovation, conversion or new construction.

### 2.2 Chuck

Quick-release chuck

## 2.3 Switches

Speed-control switch  
Two or three-gear selector switch  
Forward / reverse switch

## 2.4 Grips

Pivotable side handle  
Vibration-absorbing grip

## 2.5 Lubrication

Grease lubrication

## 2.6 The items supplied include (toolbox versions):

- 1 Power tool
- 1 Side handle
- 1 Operating instructions
- 1 Hilti toolbox

## 2.7 The items supplied include (cardboard box versions):

- 1 Power tool
- 1 Side handle
- 1 Operating instructions

## 2.8 Li-ion battery charge status

LEDs light constantly	LEDs blink	Charge status C
LED 1,2,3,4	-	$C \geq 75 \%$
LED 1,2,3	-	$50 \% \leq C < 75 \%$
LED 1,2	-	$25 \% \leq C < 50 \%$
LED 1	-	$10 \% \leq C < 25 \%$
-	LED 1	$C < 10 \%$

## 3 Insert tools, accessories

Designation	Short designation	Item number
Bit holder	S-BH 50	257257
Charger for Li-ion batteries	C 4/36	
Charger for Li-ion batteries	C 4/36-ACS	
Charger for Li-ion batteries	C 4/36-ACS TPS	
Battery	B 144/2.6 Li-ion	273114

Designation	Item number, description
SF 144-A chuck	202477, Quick-release chuck
SFH 144-A chuck	202489, Quick-release chuck
Quick-release chuck clamping range	$\varnothing 1.5 \dots 13 \text{ mm}$
Drilling diameter range in wood (soft)	$\varnothing 1.5 \dots 26 \text{ mm}$
Drilling diameter range in wood (hard)	$\varnothing 1.5 \dots 20 \text{ mm}$

Designation	Item number, description
Drilling dia. range in metal	∅ 1.5...13 mm
Wood screws (max. length 120 mm)	∅ 1.5...8 mm
HUD anchors (max. length 50 mm)	∅ 6...10 mm
HRD-U anchors (max. length 120 mm)	∅ Max. 10 mm

## 4 Technical data

Right of technical changes reserved.

Power tool	SF 144-A	SFH 144-A
Rated voltage (DC voltage)	14.4 V	14.4 V
Weight in accordance with EPTA procedure 01/2003	2.2 kg	2.4 kg
Dimensions (L x W x H)	237 mm x 85 mm x 237 mm	262 mm x 85 mm x 238 mm
Speed in 1st gear	0...380/min	0...350/min
Speed in 2nd gear	0...1,440/min	0...1,360/min
Speed in 3rd gear		0...1,900/min
Torque with tool set to drilling symbol (soft/flexible joint)	Max. 33 Nm	Max. 33 Nm
Torque range (15 settings)	2...12 Nm	2...12 Nm
Hammering speed		34,200/min
Hammer drilling in masonry (max. length 80 mm)		∅ 3...6 mm

### NOTE

The vibration emission level given in this information sheet has been measured in accordance with a standardised test given in EN 60745 and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure. The declared vibration emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or poorly maintained, the vibration emission may differ. This may significantly increase the exposure level over the total working period. An estimation of the level of exposure to vibration should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period. Identify additional safety measures to protect the operator from the effects of vibration such as: maintain the tool and the accessories, keep the hands warm, organisation of work patterns.

### Noise information for the SFH 144-A (measured in accordance with EN 60745):

Typical A-weighted sound power level for the SFH 144-A	102 dB (A)
Typical A-weighted emission sound pressure level for the SFH 144-A.	91 dB (A)
Uncertainty for the given sound level	3 dB (A)

### Noise information for the SF 144-A (measured in accordance with EN 60745):

Typical A-weighted sound power level for the SF 144-A	84 dB (A)
Typical A-weighted emission sound pressure level for the SF 144-A	73 dB (A)
Uncertainty for the given sound level	3 dB (A)

## Vibration information for the SFH 144-A in accordance with EN 60745

Triaxial vibration values (vibration vector sum)	measured in accordance with EN 60745-2-1
Hammer drilling in concrete, $a_{h,D}$	12.0 m/s <sup>2</sup>
Uncertainty (K) for triaxial vibration measurements	1.5 m/s <sup>2</sup>

## Vibration information for the SFH 144-A and SF 144-A in accordance with EN 60745

Triaxial vibration values (vibration vector sum)	measured in accordance with EN 60745-2-1
Drilling in metal, $a_{h,D}$	< 2.5 m/s <sup>2</sup>
Uncertainty (K) for triaxial vibration measurements	1.5 m/s <sup>2</sup>

## Vibration information for the SFH 144-A and SF 144-A in accordance with EN 60745

Triaxial vibration values (vibration vector sum)	measured in accordance with EN 60745-2-2
Screwdriving without impact action, $a_h$	< 2.5 m/s <sup>2</sup>
Uncertainty (K)	1.5 m/s <sup>2</sup>

Battery	B 144/2.6 Li-Ion
Rated voltage	14.4 V
Capacity	2.6 Ah
Energy content	37.44 Wh
Weight	0.55 kg
Temperature monitoring	Yes
Type of cell	Li-Ion
No. of cells	4

## 5 Safety instructions

### NOTE

The safety rules in section 5.1 contain all general safety rules for electric tools which, in accordance with the applicable standards, must be listed in the operating instructions. Accordingly, some of the rules listed may not be relevant to this tool.

### 5.1 General power tool safety warnings

- a)  **WARNING**  
Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury. **Save all warnings and instructions for future reference.** The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

#### 5.1.1 Work area safety

- a) **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
- b) **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.

- c) **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

#### 5.1.2 Electrical safety

- a) **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.
- b) **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
- c) **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.
- d) **Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts.** Damaged or entangled cords increase the risk of electric shock.
- e) **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of

a cord suitable for outdoor use reduces the risk of electric shock.

- f) **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

### 5.1.3 Personal safety

- a) **Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating power tools may result in serious personal injury.
- b) **Use personal protective equipment. Always wear eye protection.** Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- c) **Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- d) **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
- e) **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.
- f) **Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.
- g) **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.

### 5.1.4 Power tool use and care

- a) **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.
- b) **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- c) **Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
- d) **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.

- e) **Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.
- f) **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- g) **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

### 5.1.5 Battery tool use and care

- a) **Recharge only with the charger specified by the manufacturer.** A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.
- b) **Use power tools only with specifically designated battery packs.** Use of any other battery packs may create a risk of injury and fire.
- c) **When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another.** Shorting the battery terminals together may cause burns or a fire.
- d) **Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help.** Liquid ejected from the battery may cause irritation or burns.

### 5.1.6 Service

- a) **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

### 5.2 Drill safety warnings

- a) **Wear ear protectors when impact drilling.** Exposure to noise can cause hearing loss.
- b) **Use auxiliary handle(s), if supplied with the tool.** Loss of control can cause personal injury.
- c) **Hold power tool by insulated gripping surfaces, when performing an operation where the cutting accessory may contact hidden wiring.** Cutting accessory contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.

### 5.3 Additional safety instructions

#### 5.3.1 Personal safety

- a) **Hold power tool by insulated gripping surfaces, when performing an operation where the fastener may contact hidden wiring.** Fasteners contacting a "live" wire may make exposed metal parts of the

en

- power tool "live" and could give the operator an electric shock.
- Always hold the power tool securely with both hands on the grips provided. Keep the grips dry, clean and free from oil and grease.**
  - Improve the blood circulation in your fingers by relaxing your hands and exercising your fingers during breaks between working.**
  - Avoid touching rotating parts. Switch the power tool on only after bringing it into position at the workpiece.** Touching rotating parts, especially rotating insert tools, may lead to injury.
  - Activate the safety lock (forward / reverse switch in the middle position) before storing or transporting the power tool.**
  - The power tool is not intended for use by children, by debilitated persons or those who have received no instruction or training.**
  - Children must be instructed not to play with the power tool.**
  - Dust from material such as paint containing lead, some wood species, minerals and metal may be harmful. Contact with or inhalation of the dust may cause allergic reactions and/or respiratory diseases to the operator or bystanders. Certain kinds of dust are classified as carcinogenic such as oak and beech dust especially in conjunction with additives for wood conditioning (chromate, wood preservative). Material containing asbestos must only be treated by specialists. **Where the use of a dust extraction device is possible it shall be used. To achieve a high level of dust collection, use a suitable vacuum cleaner of the type recommended by Hilti for wood dust and/or mineral dust together with this tool. Ensure that the workplace is well ventilated. The use of a dust mask of filter class P2 is recommended. Follow national requirements for the materials you want to work with.**

### 5.3.2 Power tool use and care

- Secure the workpiece. Use clamps or a vice to secure the workpiece.** The workpiece is thus held more securely than by hand and both hands remain free to operate the power tool.
- Check that the insert tools used are compatible with the chuck system and that they are secured in the chuck correctly.**

### 5.3.3 Battery tool use and care

- Do not expose batteries to high temperatures or fire.** This presents a risk of explosion.
- Do not disassemble, squash or incinerate batteries and do not subject them to temperatures over 80°C.** A risk of fire, explosion or injury through contact with caustic substances may otherwise result.

- Do not use batteries other than those approved for use with the applicable power tool or appliance.** Use of other batteries or use of the battery for purposes for which it is not intended presents a risk of fire and explosion.
- Observe the special instructions applicable to the transport, storage and use of Li-ion batteries.**
- Avoid short-circuiting the battery. Check that the terminals on the battery and in the power tool are free from foreign objects before inserting the battery in the power tool.** Short circuiting the battery terminals presents a risk of fire, explosion and chemical burns.
- Do not charge or continue to use damaged batteries (e.g. batteries with cracks, broken parts, bent or pushed-in and/or pulled-out contacts).**
- Hold power tool by insulated gripping surfaces when performing an operation where the fastener may contact hidden wiring or its own cord.** Fasteners contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.

### 5.3.4 Electrical safety

**Before beginning work, check the working area (e.g. using a metal detector) to ensure that no concealed electric cables or gas and water pipes are present.** External metal parts of the power tool may become live, for example, when an electric cable is damaged accidentally. This presents a serious risk of electric shock.

### 5.3.5 Work area

- Ensure that the workplace is well lit.**
- Ensure that the workplace is well ventilated.** Exposure to dust at a poorly ventilated workplace may result in damage to the health.

### 5.3.6 Personal protective equipment

**The user and any other persons in the vicinity must wear suitable eye protection, a hard hat, ear protection, protective gloves and breathing protection while the tool is in use.**

## 6 Before use

### 6.1 Battery use and care

#### NOTE

Battery performance drops at low temperatures. Never use the battery until the cells become fully discharged. Change to the second battery as soon as a drop in performance is noticed. Recharge the battery immediately so that it is ready for reuse.

Store the battery in a cool, dry place. Never store the battery where it is exposed to direct sunlight or sources of heat, e.g. on heaters / radiators or behind a motor vehicle windscreen. Batteries that have reached the end of their life must be disposed of safely and correctly to avoid environmental pollution.

### 6.2 Charging the battery

#### DANGER

Use only the Hilti batteries and Hilti chargers listed under “Accessories”.

#### 6.2.1 Charging a new battery for the first time

A new battery must be charged correctly for the first time before use. This will ensure that the cells form correctly. Incorrect initial charging may have a permanent, negative effect on battery capacity. Please refer to the applicable

battery charger’s operating instructions for information about initial charging.

#### 6.2.2 Charging a previously used battery

Ensure that the outer surfaces of the battery are clean and dry before inserting it in the corresponding charger. Read the operating instructions for the charger for further information about the charging procedure. Li-ion batteries are ready for use at any time, even when only partly charged. Charging progress is indicated by the LED display (see charger operating instructions).

#### 6.3 Fitting the battery

#### CAUTION

Before fitting the battery, check that the power tool is switched off and that the safety lock is engaged (forward/reverse switch in the middle position). Use only the Hilti batteries approved for use with this power tool.

#### CAUTION

Check that the terminals on the battery and in the power tool are free from foreign objects before inserting the battery in the power tool.

1. Push the battery into the power tool from below as far as it will go and until it is heard to engage with a click.
2. **CAUTION A falling battery may present a risk of injury to yourself or others.**  
Check that the battery is seated securely in the power tool.

#### 6.4 Removing the battery 2

1. Press both battery release buttons.
2. Pull the battery downwards out of the power tool.

## 7 Operation

#### CAUTION

The tool may get hot during use. **Wear protective gloves.**

#### CAUTION

The power tool may suddenly swing to the side (rotate about its own axis) when drilling, hammer drilling or screwdriving. Always use the power tool with the side handle fitted and hold it securely with both hands.

#### CAUTION

To avoid injuries caused by the insert tool, wear protective gloves when changing insert tools.

#### 7.1 Setting forward or reverse rotation 3

#### NOTE

The forward / reverse switch is used to select the direction of rotation of the drive spindle. An interlock prevents switching while the motor is running. The control switch is locked when the forward / reverse switch is in the middle position. Push the forward / reverse switch to the right (power tool held in working direction) to select forward rotation. Push the forward / reverse switch to the left (power tool held in working direction) to select reverse rotation.

#### 7.2 Adjusting the side handle 4

1. Release the side handle clamping band by turning the handle counterclockwise.
2. Pivot the side handle into the desired position.

en

3. Tighten the side handle by turning the grip clockwise.
4. Check that it holds securely.

### 7.3 Speed selection

#### 7.3.1 Speed selection using the 2-speed gear switch (SF 144-A) 5

##### NOTE

The mechanical 2-speed gear switch can be used to select the speed range required. Speed with fully-charged battery. 1st gear: 0-380 r.p.m. or 2nd gear: 0-1440 r.p.m.

#### 7.3.2 Speed selection using the 3-speed gear switch (SFH 144-A) 6

##### NOTE

The mechanical 3-speed gear switch can be used to select the speed range required. Speed with fully-charged battery. 1st gear: 0-350 r.p.m., 2nd gear: 0-1360 r.p.m. or 3rd gear: 0-1900 r.p.m.

### 7.4 Switching on / off

##### CAUTION

**To avoid damage to the power tool, the switch must be released (switched off) if the motor is stalled for more than 2-3 seconds. After stalling, the power tool must be allowed to run for 2 minutes under no load.**

The speed of the power tool can be controlled smoothly (increased from zero to maximum) by pressing the control switch gradually.

### 7.5 Drilling

##### CAUTION

**Use clamps or a vice to secure the workpiece. The workpiece is thus held more securely than by hand and both hands remain free to operate the power tool.**

#### 7.5.1 Fitting the drill bit

1. Set the forward / reverse switch to the middle position or remove the battery from the power tool.
2. Check that the connection end of the drill bit is clean. Clean the connection end if necessary.
3. Insert the drill bit in the chuck and then turn the chuck sleeve until tight.
4. Check that the drill bit is held securely (check by pulling).

#### 7.5.2 Drilling

1. Move the forward / reverse switch to the "Forward" position.
2. Turn the torque and operating mode setting ring to the drilling symbol.

#### 7.5.3 Removing the drill bit

1. Set the forward / reverse switch to the middle position or remove the battery from the power tool.
2. Open the quick-release chuck.
3. Pull the insert tool out of the chuck.

### 7.6 Hammer drilling (SFH 144-A)

#### 7.6.1 Fitting the drill bit

1. Set the forward / reverse switch to the middle position or remove the battery from the power tool.
2. Check that the connection end of the drill bit is clean. Clean the connection end if necessary.
3. Insert the drill bit in the chuck and then turn the chuck sleeve until tight.
4. Check that the drill bit is held securely (check by pulling).

#### 7.6.2 Hammer drilling

1. Move the forward / reverse switch to the "Forward" position.
2. Turn the torque and operating mode setting ring to the hammer drilling symbol.

#### 7.6.3 Removing the drill bit

1. Set the forward / reverse switch to the middle position or remove the battery from the power tool.
2. Open the quick-release chuck.
3. Pull the insert tool out of the chuck.

### 7.7 Screwdriving

#### 7.7.1 Fitting the bit / bit holder

1. Set the forward / reverse switch to the middle position or remove the battery from the power tool.
2. Insert the bit adapter in the chuck and then turn the chuck sleeve until tight.
3. Check that the bit adapter is held securely (check by pulling).
4. Fit the bit in the bit holder.

#### 7.7.2 Screwdriving

1. Set the forward / reverse switch to the desired direction of rotation.
2. Turn the torque and operating mode setting ring to the desired torque value.

#### 7.7.3 Removing the bit / bit holder

1. Set the forward / reverse switch to the middle position or remove the battery from the power tool.
2. Remove the bit from the bit holder.
3. Open the quick-release chuck.
4. Remove the bit holder from the chuck.

### 7.8 Reading the charge status LED display on Li-ion batteries 7

##### NOTE

The charge status cannot be indicated while the power tool is in operation. Indication is given (LED 1 blinks) only when the battery is fully discharged or when it is too hot (temperature above 80°C).

The Li-ion battery features a charge status LED display. The charge status is indicated by the LEDs on the battery during charging (please refer to the operating instructions

for the charger). When the battery is at rest (not in use), its charge status is indicated by the four LEDs on the

battery for a time of three seconds after pressing one of the battery release buttons.

## 8 Care and maintenance

### CAUTION

**Before beginning cleaning, remove the battery from the power tool in order to prevent unintentional starting.**

#### 8.1 Care of insert tools

Clean off dirt and dust deposits adhering to the insert tools and protect them from corrosion by wiping the insert tools from time to time with an oil-soaked rag.

#### 8.2 Care of the power tool

### CAUTION

**Keep the power tool, especially its grip surfaces, clean and free from oil and grease. Do not use cleaning agents which contain silicone.**

The outer casing of the power tool is made from impact-resistant plastic. Sections of the grip are made from a synthetic rubber material.

Never operate the power tool when the ventilation slots are blocked. Clean the ventilation slots carefully using a dry brush. Do not permit foreign objects to enter the interior of the power tool. Clean the outside of the power tool at regular intervals with a slightly damp cloth. Do not use a spray, steam pressure cleaning equipment or running water for cleaning. This may negatively affect the electrical safety of the power tool.

#### 8.3 Care of the Li-ion battery

Avoid entrance of moisture.

Charge the battery fully before using it for the first time. In order to achieve maximum battery life, stop discharging the battery as soon as a significant drop in performance is noticed.

### NOTE

If use of the power tool continues, further battery discharge will be stopped automatically before the battery cells suffer damage.

Charge the battery with the Hilti charger approved for use with Li-ion batteries.

### NOTE

- A conditioning charge (as is required with NiCd or NiMH batteries) is not necessary.
- Interruption of the charging procedure has no negative effect on battery life.
- Charging can be started at any time with no negative effect on battery life. There is no memory effect (as with NiCd or NiMH batteries).
- For best results, batteries should be stored fully charged in a cool dry place. Avoid charging the battery in places subject to high ambient temperatures (e.g. at a window) as this has an adverse effect on battery life and increases the rate of self-discharge.
- If the battery no longer reaches full charge, it may have lost capacity due to aging or overstraining. It is possible to continue working with a battery in this condition but it should be replaced in good time.

#### 8.4 Maintenance

### WARNING

**Repairs to the electrical section of the power tool may be carried out only by trained electrical specialists.**

Check all external parts of the power tool for damage at regular intervals and check that all controls operate faultlessly. Do not operate the power tool if parts are damaged or when the controls do not function faultlessly. If necessary, the power tool should be repaired by Hilti Service.

#### 8.5 Checking the power tool after care and maintenance

After carrying out care and maintenance work on the power tool, check that all protective and safety devices are fitted and that they function faultlessly.

## 9 Troubleshooting

Fault	Possible cause	Remedy
The power tool doesn't run.	The battery is discharged or fitted incorrectly.	The battery must be heard to engage with a click or, respectively, needs to be charged.
	Electrical fault.	Remove the battery from the power tool and contact Hilti Service.

en

Fault	Possible cause	Remedy
No hammering action.	The torque and operating mode setting ring are not set to the hammer drilling symbol.	Turn the torque and operating mode setting ring to the hammer drilling symbol.
The on / off switch can't be pressed, i.e. the switch is locked.	The forward / reverse switch is in the middle position (transport lock engaged).	Push the forward / reverse switch to the left or right.
Running speed suddenly drops considerably.	The battery is discharged.	Change the battery and recharge the discharged battery.
The battery runs down more quickly than usual.	Battery condition is not optimal.	Have battery condition diagnosed by Hilti Service or replace with a new battery.
The battery doesn't engage with an audible click.	The retaining lugs on the battery are dirty.	Clean the retaining lugs and check that the battery engages securely. Contact Hilti Service if the problem persists.
The power tool or the battery gets very warm.	Electrical fault.	Switch the power tool off immediately, remove the battery and contact Hilti Service.
	The power tool has been overloaded (application limits exceeded).	Use the right power tool for the job (don't use a low-powered tool for heavy work).

## 10 Disposal

### CAUTION

Improper disposal of the equipment may have serious consequences: the burning of plastic components generates toxic fumes which may present a health hazard. Batteries may explode if damaged or exposed to very high temperatures, causing poisoning, burns, acid burns or environmental pollution. Careless disposal may permit unauthorized and improper use of the equipment. This may result in serious personal injury, injury to third parties and pollution of the environment.

### CAUTION

Dispose of defective batteries without delay. Keep them out of reach of children. Do not attempt to open or dismantle batteries and do not dispose of them by incineration.

### CAUTION

Dispose of the batteries in accordance with national regulations or return them to Hilti.

Most of the materials from which Hilti power tools or appliances are manufactured can be recycled. The materials must be correctly separated before they can be recycled. In many countries, Hilti has already made arrangements for taking back your old power tools or appliances for recycling. Please ask your Hilti customer service department or Hilti representative for further information.

For EC countries only

Disposal of electric tools together with household waste is not permissible.

In observance of the European Directive on waste electrical and electronic equipment and its implementation in accordance with national law, electrical appliances that have reached the end of their life must be collected separately and returned to an environmentally compatible recycling facility.

## 11 Manufacturer's warranty - tools

Hilti warrants that the tool supplied is free of defects in material and workmanship. This warranty is valid so long as the tool is operated and handled correctly, cleaned and serviced properly and in accordance with the Hilti Operating Instructions, and the technical system is maintained. This means that only original Hilti consumables, components and spare parts may be used in the tool.

This warranty provides the free-of-charge repair or replacement of defective parts only over the entire lifespan of the tool. Parts requiring repair or replacement as a result of normal wear and tear are not covered by this warranty.

**Additional claims are excluded, unless stringent national rules prohibit such exclusion. In particular, Hilti is not obligated for direct, indirect, incidental or consequential damages, losses or expenses in connection with, or by reason of, the use of, or inability to use the tool for any purpose. Implied warranties of merchantability or fitness for a particular purpose are specifically excluded.**

For repair or replacement, send the tool or related parts immediately upon discovery of the defect to the address of the local Hilti marketing organization provided.

This constitutes Hilti's entire obligation with regard to warranty and supersedes all prior or contemporaneous comments and oral or written agreements concerning warranties.
